

Area Updated	Low-Fidelity Issue Identified	High-Fidelity Improvement Implemented
Navigation Bar	Labels do not clearly differentiate key features Login and language selector felt misplaced	Added “Find care,” “Hotline,” “About us,” “FAQ,” and “Saved”; relocated login and language selector to top-right; added underline active state.
Homepage	Lack of visual emphasis The emergency warning was unclear The layout felt too minimal.	Added illustration, welcome header, emergency callout with icons, and improved “Family doctor / Walk-in clinic” selection buttons.
Search Inputs	Redundant fields Unclear labels Oversized search button	Cleaned dropdown labels (“Select province,” “Select city”); standardized search field size; disabled search button until input is provided.
Search Results	Hard to scan Lacked sorting/filters Links are not clearly clickable	Introduced structured table layout, improved spacing, blue “View more details” links, pagination, and clearer column headings.
Filter Options	Missing expected filters such as “Open now” and “Accepting new patients.”	Added checkboxes and status tags; ensured consistent placement across doctor and walk-in clinic search pages.
Clinic Details Page	Sections not separated Too text-heavy Lacked visual hierarchy	Introduced structured sections (About, Doctor(s), Address, Operations Hours, Services, Availability, Contact), improved spacing, new clinic logo area, and better margins.
Hotline Page	Minimalist Ambiguous interaction pathway Hotline number not highlighted	Added “Call now” panel, “Chat now” button, hotline description text, emergency warning, and high-contrast iconography.

Chatbot	Small icon Unclear whether active Limited discoverability.	Redesigned chat panel with greeting text, auto-suggestions, input box, close button, and active-state indicator.
FAQ Page	Not included in the low-fidelity prototype.	Added expandable accordion components for each common question; displayed answers with readable spacing.
Saved Items Page	Not included in the low-fidelity prototype.	Added filters for saved clinics, dedicated table layouts, and a search bar for searching within saved items.
Footer	Inconsistent layout with missing links.	Unified footer with grouped categories, improved spacing, and standardized styling across all pages.
